

CleanStation[®] XL Omega[™]

"First Choice of FDM Professionals"

The XL Omega is the largest production CleanStation available.

With a work envelope in excess of 33,000 cubic inches, the 140 gallon tank features a 360 degree manifold powered by a 53 gallon per minute, stainless steel pump.

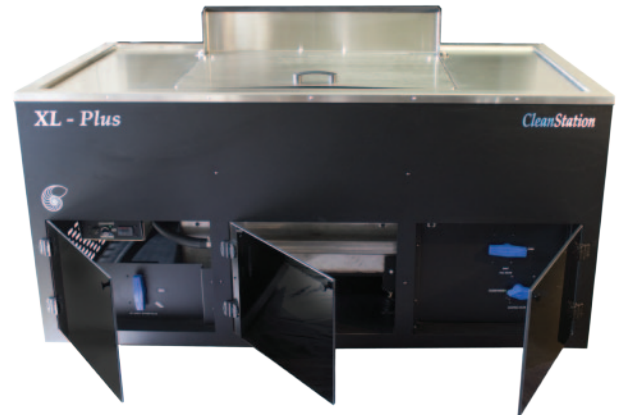

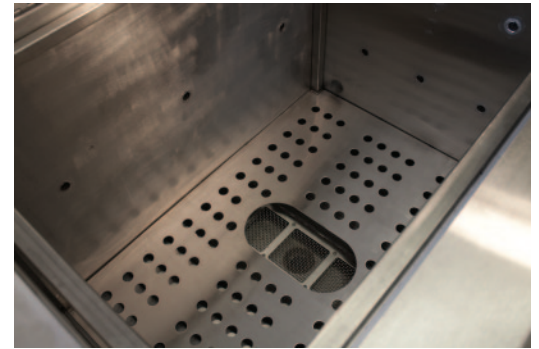

The XL Omega features a fully programmable, micro-processor controlled, 16,500 watt circulation heater combined with a 5 fan active cooling system to maintain optimal operating temperature.

Soluble Support Removal for the Fortus 900MC
